

AYUSH KULAL

Software Engineer | Backend and AI Systems

Pune, India | +91 7620726891 | ayushkulal20@gmail.com | github.com/wolfnhk20

SUMMARY

Computer Engineering student graduating in 2027. At SpurQLabs, built agent-driven performance testing, multi-tenant retrieval, and incident investigation tools. Backend experience spans FastAPI, PostgreSQL, authentication, and data isolation, alongside Java/Spring Boot projects.

EXPERIENCE

AI Agent Developer Intern · SpurQLabs | Jun 2026 – Present · Pune

- Built a four-agent performance testing pipeline that turns HAR/Cucumber flows into JMeter plans, runs load, spike, and soak tests, and analyzes JTL results in HTML and JSON reports.
- Made test flows reusable across applications by handling dynamic requests, login and JWT refresh; added PerfMon server metrics, historical comparisons, and page-level frontend timing.
- Helped turn an internal marketing-agent system into a configurable, multi-organization product with 62+ MCP tools, Apollo workflows, and a browser extension.
- Implemented organization-aware RAG with PostgreSQL/pgvector, access controls and Row Level Security; added regression tests for cross-tenant data access and safeguards for untrusted content.
- Developed observability workflows using Datadog, Prometheus, Grafana, Loki, and Promtail to investigate metrics and logs, correlate findings, and report evidence-backed incident candidates.

Product Lead & Engineer · Anchorlit | Jul 2024 – Jun 2026

- Delivered websites and web applications for clients, from requirements and API design through deployment and maintenance.

Java Developer Intern · Codec Technologies | Dec 2025 – Jan 2026

- Built Spring Boot REST endpoints and improved SQL queries for application workflows.

PROJECTS

QAForge · Autonomous QA Platform | FastAPI, Next.js, LangGraph, Supabase

- Built a repository audit pipeline with GitHub OAuth, webhook-triggered runs, live execution stages, and AI-generated findings; deployed the frontend on Vercel and API on Render.

Ragora · Multi-tenant RAG Platform | FastAPI, PostgreSQL, Redis, Docker

- Combined vector and full-text search with Reciprocal Rank Fusion; isolated tenant data and avoided redundant embedding with content hashes and chunk diffing.

Bloom Events · Event Booking Platform | Spring Boot, React, PostgreSQL

- Built Spring Boot REST APIs and a multi-step booking flow with Google OAuth, JWT, service selection, and calculated pricing.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, Spring Security, FastAPI, REST APIs, JPA, Hibernate, Maven

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Data: PostgreSQL, pgvector, MySQL, SQLite, MongoDB, Redis, Supabase

AI & agents: MCP/FastMCP, LangGraph, LangChain, RAG, LLM integration, semantic search, prompt engineering

Observability & testing: Datadog, Prometheus, Grafana, Loki, Promtail, JMeter, PerfMon, Playwright

Cloud, security & tools: Docker, AWS, Vercel, Render, Railway, Git, GitHub, Postman, webhooks, JWT, OAuth 2.0, RBAC

EDUCATION

B.E. Computer Engineering · AISSMS College of Engineering, Pune | 2024 – 2027 · CGPA 8.5

Diploma in Information Technology · AISSMS Polytechnic, Pune | 2021 – 2024 · 88.88%

ACHIEVEMENTS

1st place among 240+ participants, State-Level TechCode War 2023 | Letter of Recommendation from Pune Municipal Corporation for EcoWatchAI
